

# Oak Class (11<sup>th</sup> – 15<sup>th</sup> October 2021)

## Respect, Belief and Trust

### Class Assembly

Oak class produced a fun and brilliant whole class assembly yesterday. The children created the class assembly from their own ideas and wrote their script with their friends. Many of them were nervous beforehand and were worried about their part. I am sure you were impressed with how they presented.

Thank you to those of you who attended our assembly – it makes it more special with an audience. From those of you who would like to see the recording of the class assembly, it is on the Oak class page on Google Classroom.

### Attention Children!!

We have intra school tag rugby on Monday. Please remember your PE kit....and your try scoring trainers!

Y6 – you will be cycling as one whole group on Monday. Remember, to bring your homework!

It is Henry's last day unfortunately on Monday. I know lots of you want to wish him luck at his new school. Good luck Henry – keep being amazing! 😊

### English

**Key vocabulary: gaunt, adored, scandalised, scholar, fainted, imperial**

We have continued to use Wolf Brother this week during our guided reading sessions to build up our comprehension skills. On top of that, the children have been reading extracts from Rooftoppers, The Good Thieves and Wolf Wilder. I hope the children speak to you about these books as I know some parents have purchased some of the books that we have read since September. In writing, we have continued to focus on recounts. The children have been writing a recount of the residential trip from a couple of weeks ago. **Challenge: What makes a piece of work greater depth?**

### Maths

**Key vocabulary: long division, four operations**

the Y6 children have been getting their heads around long division! It has many steps and can be confusing but the children have nearly all grasped it. I have attached a link for you to try: <https://uk.ixl.com/math/year-6/divide-by-two-digit-numbers> The younger children in the class have been solving word problems involving the 4 operations.

**Challenge: 5457 ÷ 17?**

### Circle Time

This week, in circle time, we have spoken about our rights and responsibilities both in class and around school. Being the oldest in school, Oak class are very good at supporting the younger children, setting the example for others to follow and being just good young adults. We also agreed to a rewards and consequences charter so we all work to the best of our ability.
